RECOMMENDATIONS

To whom it may concern,

I am writing to express my sincere appreciation and provide the highest recommendation for **Tomás da Silva Nogueira**, who completed an internship at Semanto focused on the development of our corporate website. During this period, he was entrusted with the complete design and implementation of the project from scratch.

From his very first days, Tomás demonstrated excellent technical skills and an understanding of web design dynamics that far exceed what is typically expected of a junior professional. He managed the entire project lifecycle with great autonomy and precision, focusing particularly on:

- **Analysis and Design:** Brand analysis and definition of the website structure (UI/UX).
- **Technical Development:** Building the website ensuring smooth navigation and a fully responsive design (optimized for mobile devices).
- **Optimization:** Implementing basic SEO practices and improving page loading speed.

In addition to his unquestionable technical abilities, Tomás stood out for his strong interpersonal skills, and character. He showed an outstanding aptitude for problem-solving, strict punctuality in meeting deadlines, and a rare ability to listen actively — successfully translating our business needs into concrete, modern digital solutions. His proactivity, reliability, and enthusiasm brought a tangible added value to our entire team. The final results clearly testifies to the quality of his work, his dedication, and his deep sense of responsibility.

For these reasons, I recommend Tomás without any hesitation. I am certain that he will quickly integrate and bring a high-level contribution to any professional environment or future project he chooses to pursue.

I remain at your complete disposal should you require any further information or a verbal confirmation of the above statement.

Sincerely,

Andrea Bigazzi
